## AGRICULTURAL PLAINS

FACT  
SHEET

The Agricultural Plains are the most open and flat landscapes in the Toowoomba Region. These highly fertile landscapes are often located across extensive flood-plains and neighbouring flat to gently undulating plains.

Agricultural activity dominates and extensive clearing of native vegetation has occurred, opening up long-ranging views and big-skies.

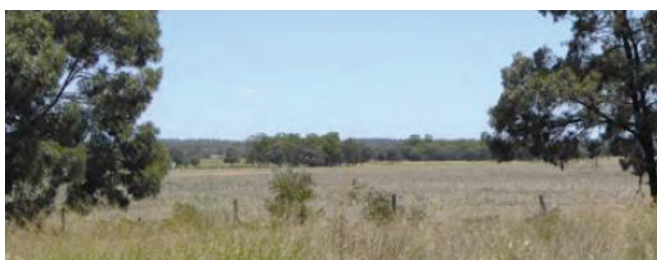

### GREEN INFRASTRUCTURE IN THIS TYPOLOGY CONSISTS OF:

#### Green Spaces

- Productive agricultural land
- Shelter belt stands of remnant trees
- Crop rotation

#### Green Corridors

- Riparian vegetation along creeks and drainage lines

### KEY VALUES OF GREEN INFRASTRUCTURE IN THIS TYPOLOGY INCLUDE:

- Local sense of place and character
- Agricultural production
- Fauna movement corridors
