

To ensure we maintain the liveability and safety for our residents, there are a few rules when it comes to parking in unmarked areas. These rules ensure access to private property and safety for all road and path users.

### Key things to remember when parking your car.

Never park your car across a driveway, on a footpath or on the nature strip. Doing this can:

- reduce visibility,
- endanger pedestrians – especially the elderly, children and disabled,
- block access for emergency services and
- interfere with access or damage underground infrastructure and services.

### Parking near an intersection

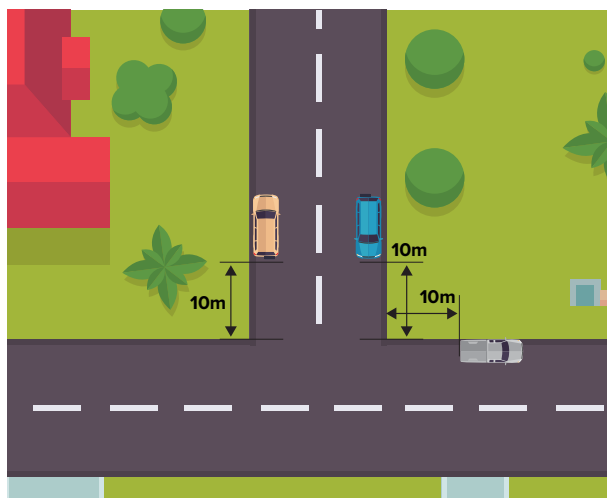

#### *With traffic lights:*

- Always leave a 20m gap from the intersection unless indicated with a parking sign (see diagram below).

#### *No traffic lights:*

- Always leave a 10m gap from the intersection unless indicated with a parking sign (see diagram below).

# PARKING – Do's and Don'ts

Park your car inside the property boundary.

Don't park your car in or over a driveway.

Always park on the road or in designated areas.

Don't park on the nature strip or obstruct a footpath/cycleway.

Always leave a three-metre gap between your vehicle and the other side of the road, the marked centreline or a vehicle parked on the other side of the road.

Parking Officers patrol all areas of the Region to ensure we maintain a safe and liveable community for all our residents and visitors to enjoy. Fines are issued to motorists who park incorrectly.
